1. The first part of the paper is devoted to a general discussion of the problem of the existence of a solution of the system of equations

$$\frac{dx}{dt} = f(x, y, z), \quad \frac{dy}{dt} = g(x, y, z), \quad \frac{dz}{dt} = h(x, y, z),$$

where

$$f(x, y, z) = \sum_{i=1}^n a_i(x, y, z) \frac{\partial F_i}{\partial x},$$

and $F_i(x, y, z)$ are arbitrary functions of the variables x, y, z .

It is assumed that
